

The Imprint Guide

What we print on your gifts — and how it looks

Every gift can carry a name, a monogram, a logo or a line worth keeping. This little guide shows the four ways we mark a product, what each one suits, and what we need from you to make it beautiful.

Not sure which suits your gift?

Send us the product and the artwork — we will mock it up and recommend the method that holds the detail best, at no cost.

What goes on the product

- **A company logo**

Placed on the lid, the face or the base — small and quiet, or full and proud.

- **A name or monogram**

Two or three letters, set in our serif or yours. Loveliest on leather, glass and brass.

- **A short line**

Up to 40 characters — a thank you, a date, a wish. Kept to one or two lines.

- **A date or milestone**

Joining day, anniversary, founding year. Engraved on the underside if you prefer it subtle.

- **A QR code**

Links to a welcome video or a note from the team. Minimum 20 mm square.

Before you send artwork

- Vector file preferred — AI, EPS, PDF or SVG. PNG at 300 dpi for full-colour print.
- Convert text to outlines so fonts travel with the file.
- Tell us the Pantone or hex codes you want held.
- Mark the placement and the size in millimetres, or let us suggest one.
- Approve a digital mock-up before we go to production — always.
